## Attention Parents of Children Between the Ages of 4 to 11

Does your child do media activities like surf the internet, watch TV, and play on smartphones?

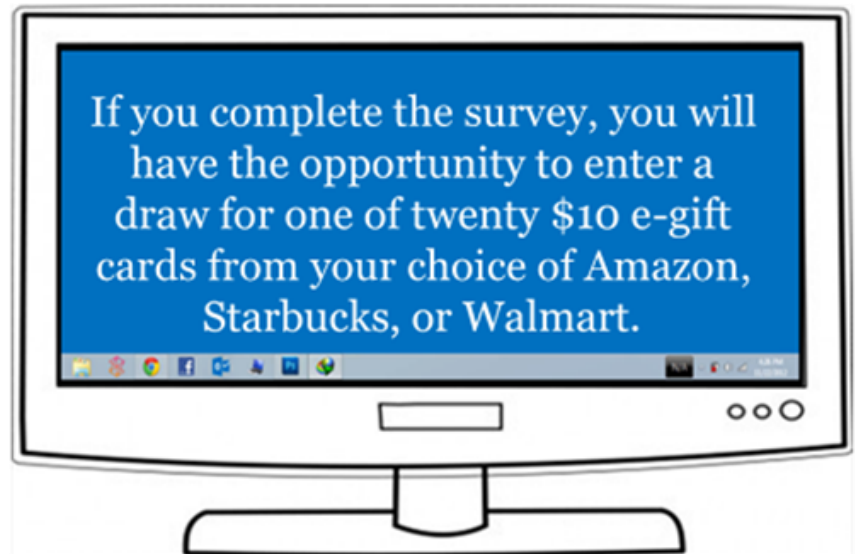

If so, you are invited to participate in an online study on how children with and without Autism use media.

The study needs parents who:

1. Have a child with or without a diagnosis of Autism
2. Have a child that has used electronic media in the past 30 days

If you agree to participate, you will be asked to answer questions about yourself and your child, your child's daily media activities, what devices they use, how they behave when using media, and what kinds of media content they like.

The survey will take about 45 to 60 minutes of your time.

To receive the link to the online survey, e-mail Eric Gilliland at:
